HSCI 2050: Foundations of Health Equity

Fall 2021, Tuesdays, 6:10-8:40pm

Do you value health, justice, and community? If so, consider enrolling in HSCI 2050: Foundations of Health Equity. This community-engaged course will introduce you to global concepts of health equity. With knowledge and awareness of national and local health disparities unfairly impacting historically disinvested communities, you will examine the cross-cutting nature of the social determinants of health for its clinical and biomedical implications in practice and research settings.

This course also serves as the pre-requisite for the new 9-credit CCAS Health Equity micro-minor. You start with this course and complete two others in the menu of micro-minor courses to earn a transcript notation.

For more information about this course and/or the micro-minor, please contact Dr. Maranda Ward at maranda@gwu.edu
